Chapter 4. Medical benefits chart

Dental services. In general, preventive and routine dental care (such as cleanings, routine dental exams, fillings, crowns and dentures) is not covered under your medical benefit.

Dental services that are an integral part of a covered medical treatment are covered. This includes a dental examination and medically necessary extractions or treatment of oral infection performed before an organ transplant, before cardiac valve replacement or valvuloplasty, and before or during chemotherapy or radiation therapy for head and neck cancer. It also includes reduction of a jaw fracture and reconstruction of the jaw after tumor removal. Your medical and dental providers must coordinate care, and the coordination must be documented in your medical record.

Chapter 4. Services we do not cover

Routine dental care, dentures, dental implants and orthodontics are not covered under this medical benefit. A dental service is not covered merely because you have a medical condition such as heart disease or diabetes, or because you take a medication that makes dental treatment riskier.

Chapter 3. Rules for getting care

You must use network providers and you need a referral from your primary care provider for specialist care. Prior authorization is required for dental services integral to covered medical treatment.

Optional supplemental dental benefit

If you purchased the optional supplemental dental package, routine dental care is covered under that package, subject to its annual maximum. See the separate dental schedule.

Your grievance and appeal rights

If you disagree with a benefit decision you may file an appeal within 180 days of the notice. You may request an external review by an independent review organization after the internal appeal.
